Subject: Keep Salt Point State Park OPEN

I am writing to support keeping SALT POINT STATE PARK OPEN FOR RECREATIONAL FISHING AND DIVING. It provides some of the best and safest access for small boat and kayak anglers and divers on the North Coast. I understand that there are individuals on the Park Staff that think it may be able to be turned into a "Point Lobos" like environment. IT WILL NOT BE AND CANNOT BE ANYTHING LIKE POINT LOBOS. Average water temp is 52 deg., avg visibility is 4-10 ft. Gerstle Cove is already protected and will probably stay that way. Most people who are not consumptive divers scuba dive in Gerstle Cove and would probably not venture out of the cove due to the rough and hazardous conditions anyway. Please take this into consideration when making your decision.

Thank you,
